Yann [164]

clj-jwt [3 (3 / 0)]

- W27 Version 0.5.2-SNAPSHOT
- W27 Version 0.5.1
- W27 Merge pull request #4 from latacora/master

ctia [1 (1 / 0)]

- W10 bump snakeyaml to address CVE-2022-38751 [#1346](#)

iroh [88 (85 / 3)]

- W30 Fix a URL detection from HTML [#8165](#)
- W30 Revert "Incident Summary Migration" [#8163](#)
- W30 [Monetization]: Fix business logic of data retention [#8142](#)
- W30 Allow braces with iroh-core/strint [#8051](#)
- W29 Remove SecureX branding and attempt to match SCSO branding for invitation and OAuth2 authorization [#8111](#)
- W29 [Registration UI]: Rework to remove SX reference [#8110](#)
- W29 Entitlement summary technical values [#8094](#)
- W29 [PIAM] Make enterprise id mandatory for piam [#8069](#)
- W28 PIAM: Enhance provisioning tracking [#8061](#)
- W27 Make country-name optional from the whoami. [#8050](#)
- W27 Do not send email for XDR org during AO bootstrap [#8045](#)
- W27 [PIAM] Show the whole response on onboarding errors [#8039](#)
- W27 Makes feature-flag change access more precise [#8026](#)
- W27 Revert "woke tool added (#7926)" [#8029](#)
- W25 Sorted Idps [#7997](#)
- W25 Add default value in the Swagger UI description. [#7995](#)
- W24 Hide even more hidden APIs [#7979](#)
- W24 [PIAM]: Support passing body parameter to onboarding via Provisioning API [#7986](#)
- W24 Upgrade SX to XDR org via provisioning [#7981](#)
- W24 feature-flag scopes are considered as special [#7985](#)
- W24 fix local dev environment to be able to start locally without docker [#7944](#)

- W23 Use org to display the roles as expected [#7952](#)
- W22 Fix SCSO rebrand name. [#7937](#)
- W22 Rebrand from SecureX Sign-On to Secure Cloud Sign-on [#7935](#)
- W22 A few additional helpers [#7914](#)
- W20 [IROH Auth] Entitlement Service [#7870](#)
- W19 Change the scope for ff change [#7857](#)
- W18 replace clj-momo deep-merge [#7815](#)
- W17 Add a missing option to disable default configs [#7805](#)
- W17 Add a script to init tokens without login in [#7794](#)
- W17 Fix schema for Response [#7804](#)
- W17 Add support to onboard a single app [#7796](#)
- W17 Add a role introspection route to help the UI and other clients [#7785](#)
- W17 Fix scopes declaration for execute-workflow route [#7799](#)
- W16 Fix a Swagger bug due to schema name conflict [#7790](#)
- W14 Web api search improvements [#7728](#)
- W14 add profile and notification to ao-jwt [#7726](#)
- W14 Tk store combinator search queries (AND, OR, NOT) [#7691](#)
- W13 Fix a case where the body is nil [#7685](#)
- W13 Add xdr-instance-id field to the orgs [#7707](#)
- W13 PIAM: Provisioning onboard endpoint [#7659](#)
- W12 Add ff scope script [#7680](#)
- W12 added a script to add feature-flag scopes from command line [#7676](#)
- W12 prefer to use client from DB than client from config [#7672](#)
- W12 Align scopes to SXO behaviour [#7673](#)
- W11 fix lein start [#7663](#)
- W11 PIAM provisioning no idp-mapping for create user [#7655](#)
- W11 Default bootstrap & config [#6868](#)
- W10 Add Entitlements to Orgs [#7631](#)
- W10 Remove yaml to supported format for profile API [#7632](#)
- W10 Fix a flaky test in either_test.clj [#7610](#)
- W09 Role Matrix representation in the code. [#7583](#)
- W08 fix some wording only for admin users view [#7579](#)
- W07 Improve User login logs situation [#7555](#)
- W07 Added a composable redis.nix [#7535](#)
- W04 Fix template rendering during invite confirmation [#7480](#)
- W04 Display virtual users in the batch get users [#7473](#)
- W02 Add the UI session logout into IROH-Auth [#7431](#)
- W51 Use short random id for code and csrf [#7417](#)
- W50 Revoked grant should reject event trusted clients [#7394](#)
- W47 RBAC Technical Design [#7314](#)
- W47 Open Impersonate INT/TEST to help UI dev [#7316](#)
- W42 Add kibana links to Admin UI [#7224](#)
- W42 Fix a login button bug in the cross-region admin UI [#7214](#)
- W42 Update ini4j to 0.5.4 [#7199](#)
- W41 Fix logic for Allow All Role to login [#7185](#)
- W41 Deploy the Cross Region Admin UI [#7177](#)
- W41 bump to jackson-databind 2.14.0-rc1 [#7160](#)
- W40 Update jackson-databind [#7159](#)
- W39 Provide a TAC route to change the user's role [#7133](#)
- W39 Fix PIAM Provisioning [#7129](#)
- W39 [Platform] PIAM targeted Provisioning CRUD [#7073](#)
- W39 Fix 500 error response on invalid JWT [#7112](#)
- W38 [IROH-Auth]: Support wildcard for allowed-login-origin on INT [#7085](#)
- W38 Fix and Improve some HTML pages [#7079](#)
- W37 Fix master [#7069](#)
- W37 Improve Auth Mgmt logs [#7067](#)
- W37 Add structured logs to SSE proxy [#7065](#)
- W37 Improve error message on DB schema error [#7061](#)
- W36 Add a testing case for custom OAuth2 routes [#7033](#)
- W36 Cleanup tests 2022 08 [#7014](#)
- W36 Improve the script to delete duplicate accounts [#7028](#)

- W35 Attempt to use iroh-crud for UserService [#7008](#)
- W34 Improve Org/User Services Either 2nd [#7002](#)
- W31 Session token lifetime with code param [#6818](#)

between 12 and 13 months ago

- W30 remove random-uuid override warning [#6940](#)
- W27 disable vulnscan [#6864](#)
- W27 Script to remove duplicate users [#6826](#)

oauth2-client-demo [4 (4 / 0)]

- W41 Add local env
- W41 Parametrize the device code test
- W41 support public device grant clients
- W41 improved doc

ring-jwt-middleware [3 (3 / 0)]

- W24 Version 1.1.4-SNAPSHOT
- W24 Version 1.1.3
- W24 Support external error via is-revoked-fn

scopula [13 (13 / 0)]

- W49 Version 0.3.1-SNAPSHOT
- W49 Version 0.3.0
- W49 updated version and deps
- W49 Merge pull request [#5](#) from threatgrid/scope-aliases
- W49 Minor fixes, update README
- W49 Use scopes set length instead of count
- W47 Update README.org
- W47 minor corrections
- W47 Improve scope-aliases
- W44 Improve methodology to not fail on special cases
- W44 Basic compression heuristic for aliases
- W44 Make scopes-expand additive only
- W44 Add scope-expand function

tenzin [2 (2 / 0)]

- W13 use iroh.main for all nodes types [#2862](#)
- W13 Update iroh.job.jinja [#2861](#)

tenzin-config [24 (24 / 0)]

- W25 Configure SCA in all missing envs [#927](#)
- W24 Enable XDR roles in PROD [#919](#)
- W23 factorize PROD [#917](#)
- W23 Add role-web-service config everywhere [#911](#)
- W23 Canonicalize the configs ([#913](#)) [#915](#)
- W23 Canonicalize the configs [#913](#)
- W23 Add missing role-web-service everywhere [#910](#)
- W23 Gen configs git pre-commit hook [#908](#)
- W23 Factorisation iroh/iroh-async confs [#904](#)
- W23 Tree config structures to prevent config duplication. [#901](#)
- W22 Fix SCSO name [#898](#)
- W22 rebrand from SecureX Sign-On to Secure Cloud Sign-on [#896](#)
- W16 fix missing iroh-async web-services [#884](#)
- W16 align iroh and iroh-async confs [#883](#)
- W15 Add CSC onboarding URLs [#875](#)
- W13 fix provisioning service [#863](#)
- W13 PIAM config change (+ bootstrap cleanup) [#677](#)

- W09 add perf.orbital.threatgrid.com to allowed login origin #854
- W51 sorted router server #810
- W51 sorted bootstrap on INT #809
- W47 provide open impersonate on INT/TEST #782
- W46 update TG clients for new ribbon #774
- W41 Cross Region UI conf #745
- W38 Added ENV and Region in the confs #729

xdr-provisioning [26 (26 / 0)]

- W30 Add a script to cleanup test accounts
- W30 rename script and improve error
- W30 minor improvement
- W30 fix ISO code to use 2 chars only
- W30 use the env from the table
- W30 fix tsv-to-commands.sh
- W30 add tsv-to-commands.sh
- W29 add an option to force di and csc onboarding even for org upgrade
- W27 improve README.md
- W27 update help error message
- W27 update the doc
- W27 Updated the script to match all possible use case
- W27 Add SXO to the modules to add for SCA owners.
- W27 Improved doc and safety
- W27 Check if user is admin and improve creation check
- W27 Improved upgrade PATH
- W27 Provide two scripts
- W27 Merge pull request #1 from advthreat/sca-support
- W27 add a few logs and better error support
- W27 Add XDR feature-flag
- W27 Optional support for SCA
- W17 Improve help regarding setting env vars
- W17 Improve the command line parsing
- W17 rename script to .sh
- W17 Add onboarding of DI and CSC
- W16 Initial provisioning Script
